GUARANTEED QUALITY SINCE 1899

Create your own...
Cork coaster

#ForTheArtistInYou

All you need:

- **Talens Art Creation Beton paste**
- **Talens Art Creation Metallic**
- **Palette knife**
- **Soft brush**
- **Tape**
- **Cork coaster**

1. Use the tape to divide the coaster into separate areas.

2. Apply a layer of **Beton paste** to one of the areas using a palette knife.

Take off the tape immediately; don't wait for it to dry. Once the **Beton paste** has dried you cannot remove the tape anymore and the beton layer might break. Let it dry for 2 hours.

3. Use the tape to divide another part of the coaster.

4. Shake the **metallic** paint before use, and add to the coaster using a soft brush. The paint dries in 10 min. Take off the tape immediately or once the paint is dry.

The **Beton paste** dries completely in 24 hours. After use, clean the palette knife and soft brush immediately with water. For decorative purposes only; make a clipboard, bulletin board or a coaster for accessories. Don't use with hot pans, etc.
