

Talens Art Creation Crackle Medium gives the paint layer a cracked effect, such as with old paintwork or crockery. Use the Crackle Medium in combination with 2 different colours of Vintage Chalk paint; for example a light undercoat with a darker top coat if you want to create a light 'crackle', and a dark undercoat with a light top coat if you want a darker 'crackle'. This allows you to create your own Vintage effect.

Paint a first layer with the chalk paint. Let it dry for 30 minutes, then apply the Crackle Medium with a round or flat brush. The thickness of the layer determines the size of the cracks. Experiment with this on small test samples for the desired result. Clean the tools immediately with warm water after use. Let the layer dry for approx. 1 hour, then apply another layer of paint. This layer will crackle immediately, so ensure that the paint is applied well in one layer. This layer can be finished with Talens Art Creation varnish as you wish.

\*Also available in 250 ml

*Cotton white 1002	*Sweet vanilla 2027
*Pastel pink 3504	*Dusty pink 3505

The various colours of chalk paint can be mixed with one another, allowing you to create some attractive tints.

# VINTAGE CHALK & CRACKLE MEDIUM

For the artist in you.

## Create something special!

Upcycling involves the re-use of old furniture and accessories such as (mirror) frames, flower pots, etc., and has developed into a true lifestyle that can fit in with almost any interior. Talens Art Creation Vintage Chalk paint, an opaque, matt chalk paint, makes it possible to create a nostalgic vintage ambiance as well as a more modern look. In addition to Vintage Chalk paint, there is Crackle Medium. This medium gives an attractive craquelé (cracks) effect in the paint layer.

Talens Art Creation Vintage Chalk paint gives a matt finish to a wide range of grounds, and is very easy to use. Degrease the ground, and clean or lightly sand the surface. Stir the paint well before use. Apply Vintage Chalk paint with a wide, soft brush or smooth roller. Clean your tools afterwards with warm water. The chalk paint dries quickly, but leave it to harden for 24 hours before sanding. Vintage Chalk paint is only suitable for interior use.

**Tips:\*** By rubbing vaseline or the wax from a tea light on some areas of the ground, you ensure that the paint does not adhere well there. Once dry, you can sand off the wax layer to give an old and weathered look.

\*To give a modern look, you can also combine the paint with Beton paste. For an old look, you can sand the paint layer away according to preference.

For the artist  
in you.

With its 120 years of experience in Fine Art, Royal Talens guarantees you quality. The expertise gained in this period has been used to develop a particularly creative range for Talens Art Creation.
